Learning to use Adobe Photoshop CC 2019 again on a fast computer was really easy, lots of new things were added to the software. It has many powerful features that have come with the latest version as well as other improvements. It works fantastic on any Windows 10 PC or laptop, as it's fully compatible (you just get a "one time" registration fee). I really like the new features that I've seen so far, such as an updated "understudy" layer feature and the new "paint" objects. It is not cheap, though, but then again it is a professional level application. But when compared to other photo editing and manipulation software programs, like f.stitch or Photo Merge by Helicon, it is still the leader. Photo Merge and f.stitch are similar to Photoshop in that they are both good programs with similar capabilities. They are not as versatile as Photoshop is.
